A New Gold Standard in Golf Greens

Over 20 Years we've seen it all. We've combined the best turf, the best base, with an infill that matters. This makes for a golf green surface top-level pros would be thrilled to call their own

ARTIFICIAL GOLF GREENS, FRINGE TURF, SAND TRAPS

Best known for prodigious installations employing the highest North American manufactured products combined with a passion for golf, landscape design, and construction is proof Design Turf has developed the trust & expertise to tackle all jobs big or small. The only limitation is the customer's imagination! Be it a basement golf green or larger properties, we'll take it on with equal enthusiasm.

### DESIGN TURF'S INFILL

Just as important as our world-class turf, the infill is a critical component of our putting green system. Not only is our Envirofill/Microban infill a tremendous aesthetic and helps dictate the ball-to-surface interaction, but, more importantly, it increases the longevity of the green, killing 100% of all bacteria negating weed growth, algae, mold, and moss.

Call Us
